

Drafting an emerging picture

Name: Joseph Bello

Community (UN SD goal): UN Goal 5: Achieve gender equality and empower all women and girls

Date: Oct 19, 2021

Instructions:

Using your researched information fill out the flowing comparing the current state of the art with what you think new (software) innovations could bring to the community

Covering the orientations			
Compare the left-hand column of the document "Technology configuration inventory" table with the right-hand column of the document "Community characteristics & orientation" table. What do you notice about the match (or mismatch) between your dominant community orientations and the current configuration of tools?			
How well does the technology inventory cover the orientations? What themes emerged from both the community orientations and the technology configuration from your colleagues' notes	The technology inventory document does a good job of covering the orientations.		
☐ Are you almost there?☐ Are there big gaps?	I cannot identify any big gaps		
What is the range of skills? If their interests and/or skills are diverse, could it cause conflict or distraction?	Conflict would not arise as a result of diverse skills. The range of skills is from a high schooler to an adult.		
Achieving integration			
Look at all the pieces of your configuration			
What level of integration and interoperability has been achieved?	The app is still in development but users will eventually be able to view, filter, and share stories anonymously		
Where are there big gaps			
Balancing the polarities (Current state)			
How is the configuration balanced with respect to each polarity?			

Synchronous >>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>		<>>>>> AsynchronousAsynchronous tools?
Participation >>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>		<<<<<<<< Reification Reification tools?
Group >>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>		<<<<<<<< r/> / / / / / /</td
How well does this balance fit your community?	It does not	
Solution seeking		

Solution seeking

In the new configuration, do you want your choice of tools to affect the polarities of your community in ways that differ from the current configuration? Which way?

Synchronous >>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>	<>>>> Asynchronous New asynchronous tools?
Participation >>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>	<><<<<< Reification New reification tools?
Group >>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>	<><<<<<< >Individual New individual tools?

MVP notes

- 1st MVP: Users should be able to share and view stories on the app. The should be able to sign in, sign up, and verify emails.
- 2nd: Users should be able to share and view stories on the app. The should be able to sign in, sign up, and verify emails. They should be able to filter by category or location and sort stories based on likes, most recent.
- 3rd: Users should be able to share and view stories on the app. The should be able to sign in, sign up, and verify emails. They should be able to filter by category or location and sort stories based on likes, most recent. Users should also have access to a map (like an api) that makes it convenient for them to select and see all stories in the selected location.
